

Recommendation for Thor Ib Wessman
(Translated from danish)

Klatreskoven 21 sep.2015

Thor has been working for Klatreskoven full time since 10th of March 2015, and will continue working here until 31st of October.

Thor has obtained the following qualifications:

Working with newly felled wood, including debarking, grinding, processing for different challenges.

Working with rope, including different knots, splicing, and the usage of thimbles.

Working with lumber and as a woodworker.

Planning and working in heights. Here Thor developed great experience, since he helped build more than 20 challenges in a climbing/adventure park, from 4 to 10 meters height.

Thor has become a certificated ERCA (European Ropes Course Association) instructor and rescuer. ERCA is the European organization for climbing parks, and it ensures that they follow the EN standards while training instructors.

Thor has worked with different groups of people, who have been to our climbing parks, all from school children, child birthdays, to company team building, and events.

Thor has completed these challenges satisfyingly, and has evolved in a very positive direction.

Thor has always looked after his job, arrived on time, and is always willing to make an extra effort.

I can only give my best recommendation for Thor, since he is an extremely serious and very diligent co-worker.

With best regards
